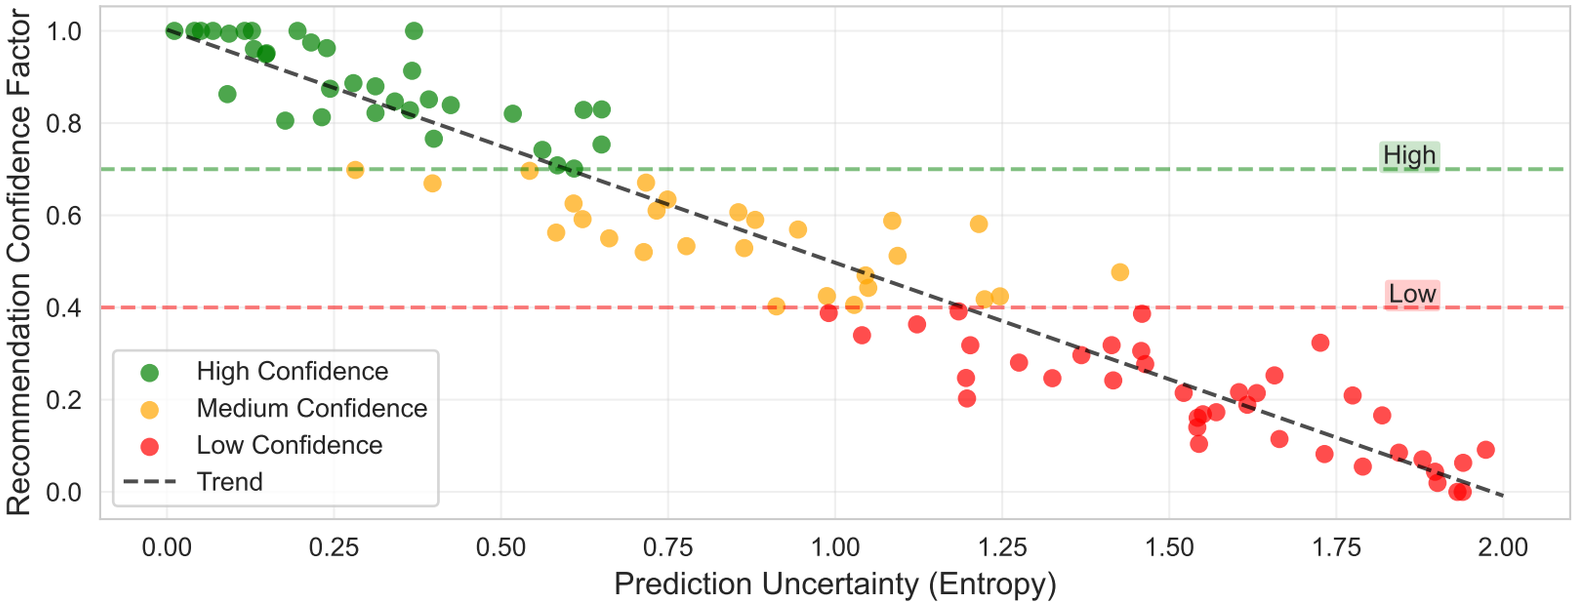
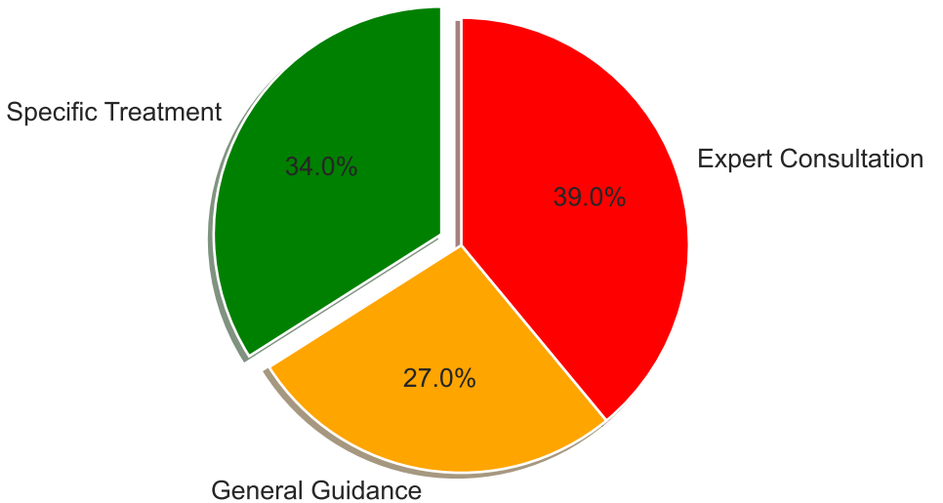
Uncertainty-Aware Recommendations in ExplainableCropAI

Relationship between Prediction Uncertainty and Recommendation Confidence



Distribution of Recommendation Types



Examples of Context-Aware Recommendations Based on Uncertainty

Disease	Prediction Confidence	Uncertainty (Entropy)	Recommendation
Bacterial Leaf Blight	0.94	0.20	Apply copper-based bactericide such as copper oxychloride
Brown Spot	0.75	0.80	Consider applying fungicides containing propiconazole or tri
Leaf Blast	0.52	1.50	Multiple diseases possible. Consult local agricultural extens
